California Energy Commission Report – RESULTS TELL THE STORY

“You created a partnership with the property management industry, trade associations, cities and individual companies. You secured participation of over 350 buildings in the program, encompassing virtually every type of business, from small buildings with a few hundred dollars in rebates to larger buildings receiving over \$150,000 in rebates. Your integrated program management, facilitation, and comprehensiveness made it easy for these companies to move ahead and contributed to their recognition of the opportunity and their decision to participate.”
